Education

University of Michigan Ann Arbor, MI
Master of Business Analytics *June 2026 - May 2027*

- Relevant Coursework**:** Probability and Statistics, Predictive Analytics, Data Exploration & Visualization, Data Programming, Data Architecture & Acquisition, Advanced Spreadsheets

Texas Christian University Fort Worth, TX
Bachelor of Business Administration in Business Information Systems, GPA 3.98/4.0 *August 2022 – May 2026*

Work Experience

University of Michigan – Michigan Union Ann Arbor, MI
Event Operations Data Assistant *September 2026 – Present*

- Validate 70–120 catering and billing records (food and beverages) across 7 Point Ops, Food Service Suite (FSS), EMS, and Google Sheets, verifying event details, quantities, food and beverage totals, gratuity, staffing charges, and operating costs to support accurate billing and reporting
- Conduct cross-check audits of event records to identify and correct discrepancies in operational and financial data before event execution

Texas Christian University Information Technology Fort Worth, TX
Frontline Information Technology Intern *May 2023 – May 2026*

- Analyzed 6,000+ Cherwell support incidents to surface recurring issue trends — Microsoft 365, account access, and networking accounted for 70%+ of requests — informing standardized troubleshooting strategies
- Improved data quality and reporting reliability by standardizing incident documentation and categorization processes, enabling more accurate trend analysis and cross-team reporting
- Assessed support performance metrics across 50+ weekly requests to identify efficiency gaps, contributing to an 80% first-contact resolution rate and 90% customer satisfaction rating

Projects

Healthcare Data Integration & Revenue Analytics *Aug 2025 – Dec 2025*

- Processed and analyzed 400+ operational healthcare data files (patient, claims, and payment) from two clinical systems using Python and SQL, reducing manual data preparation time by 80%
- Developed a Python-based ETL pipeline to clean, transform, and standardize 40+ data fields across electronic medical record (EMR) and revenue cycle systems, resolving schema inconsistencies, payer mappings, and date formatting issues
- Collaborated with clinical and technical stakeholders to design interactive Power BI dashboards comparing 2 healthcare systems, tracking 5+ KPIs (total claim charges, payments by method/system, monthly claim trends), and delivered data-driven recommendations on data standardization, governance, and analytics expansion supporting ~$1.3M in potential annual cost savings

AdventureWorks Customer & Product Sales Intelligence *Aug 2024 – Dec 2024*

- Led a 4-member team using Agile to analyze 31,000+ sales orders and 120,000+ transactions from the AdventureWorks database, uncovering revenue trends, customer purchasing patterns, and product performance insights, including 250% annual sales growth and $94M+ revenue concentration in Bikes, to support strategic decisions on product diversification and marketing
- Executed advanced SQL queries (CTEs, joins, and aggregations) to evaluate customer purchasing behavior, product profitability, regional sales performance, and year-over-year revenue trends
- Developed interactive Power BI dashboards tracking $135M+ in sales performance across customers, products, employees, and geographic regions, enabling stakeholders to monitor KPIs and identify growth opportunities

Global Retail & Profitability Analytics *Aug 2024 – Dec 2024*

- Collaborated with a team of 4 to build 4 automated Alteryx workflows that transformed 50,000+ multinational retail transactions into analysis-ready datasets across customer loyalty, pricing, cross-selling, and returns
- Created Tableau reports, combining multiple visualizations to analyze customer behavior, pricing performance, and operational insights for business stakeholders
- Identified business opportunities through discount, loyalty, and return analysis, finding discounts above 30% reduced profit margins by 50–60%, regional loyalty rates ranged from 1% to 56%, and return rates exceeded 5% in key categories, supporting recommendations for pricing optimization, retention strategies, and inventory improvements

Skills

- **Programming & Data Analysis:** SQL, Excel, Python, R, Pandas, NumPy, Alteryx, SAP
- **Data Visualization & BI:** Tableau, Power BI
- **Analytics Methods:** Data Cleaning, ETL, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Tracking
- **Business & Project Management:** Agile, Scrum, Lean, CAGE, STEEPLE, SWOT Analysis
